

Seminar and Presentations

Please rate the following statements in respect of this workshop:

| Score | Aspect of Workshop | Excellent (10) | Good (8) | Average (6) | Acceptable (4) | Poor (2) | Unacceptable (0) |
|---------------------|--|--------------------------------------|--|---------------------|----------------|----------|------------------|
| (426) 8.2 | 1. The workshop achieved the objectives set | (150) | (232) | I (36) | II (8) | | |
| (430) 8.1 | 2. The quality of the workshop was of a high standard | (100) | II (296) | (30) | I (4) | | |
| (432) 7.9 | 3. The content of the workshop was well-suited to my level of understanding and experience | (140) | (232) | (48) | (12) | | |
| (416) 7.7 | 4. The workshop was interactive and networking could be achieved | I (110) | II (216) | (78) | (12) | | |
| (484) 9.1 | 5. Speakers and facilitators were well-prepared and knowledgeable on the subject matter | II (320) | (152) | II (12) | | | |
| (404) 7.5 | 6. The duration of this workshop was neither too long nor too short | (130) | (160) | I (96) | (16) | I (2) | |
| (418) 7.7 | 7. The logistical arrangements (accommodation, meals, refreshments, equipment) were satisfactory | I (210) | I (128) | (54) | I (24) | I (2) | I (0) |
| (466) 8.6 | 8. Attending this workshop was time well spent | (250) | (184) | (24) | II (8) | | |
| 8.1 | AVERAGE TOTAL SCORE | | | | | | |

Comments and suggestions

I have the following comment and/or suggestions in addition to questions already answered:

Workshop Sessions:

- Coming to Antalya for 1 day of Workshop was very tiring because of transportation etc.
- Thank you.
- It was lovely.
- Workshop session durations and breaks were ideal.
- Some presentations were too long. More summary information could be given.
- As power plant operators, we want to discuss how and with which technical applications we can reach the new changed emission values that will be requested from us. The projects which will be carried out in this context will not be easy and cheap investments.
- Presentations about contents of legal legislations, transition periods, and other legislation and about their integration (CEMS – Continuous Emission Measuring System -, Tracing Greenhouse Gases etc.) could be improved. Best available techniques should be explained in more detail and should be illustrated.
RIA, LCP Data Assessment sessions can be explained with more current studies.
- For both presentations and questions, one day was not enough. The workshop should be at least 2 days.
- Thank you for sharing.
- In the afternoon sessions, the delay in the beginning of the workshop hindered the programme. It was beneficial to share the project content with shareholders.
- The duration of the sessions were pretty good. Thank you for determining these durations as not to bore people.
- The sessions were short according to the workshop content. The duration of the workshop can be increased on a basis of days. By having longer sessions, more information about the content and more experience can be shared.

Facilitators:

- Time should have been used more productively.
 - The hotel is not suitable for seminars etc. It is very disturbing that even internet access has an unreasonable price and the hotel's system is not all-inclusive. In the night after the event, we had to pay the accommodation for ourselves (300 TL), or we had to make a night travel if we had the possibility.
 - Thank you for devoted endeavouring.
 - Thank you.
 - It was nice.
 - Dinner after the workshop could be included in the organization.
 - They mastered their topics, they encouraged participation. Thank you.
 - There wasn't a standardized accommodation service in the hotel. This was a uncomfortable situation from participants' point of view.
 - A better relationship could be obtained among participants. An occasion for participants to meet and exchange opinions could be prepared. Even if we came to the hotel 1 day before the workshop, such thing has not been provided.
 - The team was good and the presentations were useful, the organization was pretty good.
 - Pretty successful.
 - The organization was flawless. Thank you.
 - I think the organization has carried out very well. Thanks to Ms. Nazlı Aktaş for her efforts and attention.
 - Thank you for the efforts of organization team.
 - The team was quite successful, the program was successful.
-

Workshop level and content:

- There should be more non-governmental organizations like Nature Conservation and Health Organizations.
- I am the opinion that in the context of the workshop, the inclusion of some explanatory and application-oriented information would be better with regard to this project to succeed.
- Thank you.
- Since it is the first workshop it can be considered as fine.
- The presentations in the workshop are like a fast summary. Additional to informing, it would be appropriate to mention/evaluate these aspects:
 1. Evaluating the emission amounts that existing companies should decrease within the legal period. For instance, x parameter's decreasing to 20 units whereas its legal limit is 100 units...
 2. Giving examples of best available techniques (BREF) that can be applied to pollutant parameters' decrease within the determined time and in applying examples in the basis of facility (with illustrations)
 3. Calculating an example costs oriented to pollutant cost reduction.
- I am the opinion that it would be appropriate that applications should be carried out by keeping the workshop duration a bit longer, even if these expectations are included in the presentations.
Although the laws are compulsory, staff that is in the position to apply these things, should be informed and believe that they can achieve would make it easy in the transition period in the name of our country. Regards.
- It was in an understandable level and sufficient as content.
- I am the opinion that the number of participants from LCP Operators were not many. It should be helpful if more people from operators would participate.
- Pretty good / can be enriched by illustrations.
- I think it was at the level that everyone (the participants) could understand and they understood.
- Instead of clear and precise information sometimes more detailed and explanatory information should be given. It caused that the subject, the applications and the actions to be taken cannot be clearly understood.
- It is sufficient on a sectoral basis and it addressed to sector workers. The content in the level of legislation interpretations should have been more detailed.
- There should be information in the scope of Content of Inventory Workshop.
